

Meeting Date: July 18, 2007

Agenda Item No. 8

Agenda Item: New License System Update

Bureau Chief Approval: _____

Prepared by: Jim Lau

Background:

Jim Lau and Craig Wiedmeier will present an update on the new Outdoor Central licensing system currently in operation.

- The new Outdoor Central IWILD system went live at IDFG regional offices on May 25 and then at all vendor locations on June 1.
- Preliminary data results show the new IWILD system processed approximately 46,459 transactions (55,802 individual licenses and controlled hunt applications were issued, duplicated, or canceled) from June 1 through June 6. Most of those transactions occurred on June 4 and June 5. We are continuing to work with Outdoor Central to ensure that all of the data has been provided to IDFG and will provide up to date sales data at the Commission meeting.
- The Outdoor Central main host system has not experienced any downtime since going live.
- License Section Staff continue to test new software releases to fix outstanding defects and will begin planning a phase 2 implementation for issues that were deemed non critical for go live.
